Dr David Searle BVSc DVCS

In support of the Dolly's Dream Charity, Central West Equine are pleased to offer an Equine Embryo Transfer Procedure.

The successful bidder will receive a recipient mare on lease, 45 days pregnant carrying an embryo created with the mare and stallion of their choice.

This package is typically worth approximately \$6,000 and includes the following;

Inclusions:

- Preparation of the donor mare for breeding – reproductive scanning, routine reproductive medications as required
- Insemination of the donor mare
- Post insemination treatment of the donor mare – reproductive scanning and monitoring for development of uterine fluid
- Embryo flush of the donor mare to retrieve an embryo
- Provision of a specially selected recipient mare
- Embryo transfer into the recipient mare
- Pregnancy tests of the recipient mare at 15, 28 and 45 days gestation
- Agistment of the recipient mare until 45 days gestation
- Agistment of the donor mare/stallion

Exclusions:

- Routine maintenance of the donor mare/stallion if required while at CWE (worming, vaccinations, farriery)
- Agistment of the donor stallion (if applicable)
- Non-routine reproductive medications
- Costs associated with delivery of semen (chilled, frozen)

Specifications:

This agreement stipulates 3 attempts to obtain a positive pregnancy in a recipient mare using the owners' choice of mare and stallion. If after 3 attempts the process is unsuccessful, substitution of mare or stallion or both will be required.
